W. H. WHITE.

Farmers occupying a virgin soil, find tended, and embracing such a greafunctions of the soil are to hold or 'fix' these elements, elaborate and yield them and yield them and yield them as food for plants. Some plants require a certain quantity of one element, others need an amount of some different element. These different elements are supposed to be held in the number of acres they own, but in the number of acres they own, but in the production ecenomically derived there the son of gelatine in one gallon of the soil of the soi the soil, mostly as compounds, and before becoming available to the plant, it digested, claborated, in the soil. Now element essential to the particular plant grown on it, it is very evident that it cannot supply that element in sufficient quantity to the plant which demands it neither can it if the plant-food in it be abundant but locked up in combination with other elements; so that particular plant will fail to thrive on the land, not because the soil is 'worn out,' but merely because it is deficient in this element properly elaberated. If we take plants of a different class, demanding some other elements will thive and produce abundantly. The reason, then, why one classed plants will thrive and produce abundantly. The reason, then, why one classed plants will thrive and produce abundantly. The reason, then, why one classed plants fulls in a soil in which demands it necessarily through Oswego, whence they are dantly. The reason, then, why one class of plants fails in a soil in which they have drawn from the soil so much of the elaborated element needed by the short of the soil so much they are to be used. This refuse spring and Summer, folding your worst-from the asherics contains considerable them as food that enough does not harden the water. How TO KEEP MOTHS OUT OF WORSTED GOODS.—At the approach of spring and Summer, folding your worst-from the asherics contains considerable and summer, folding your worst-from the asherics contains considerable and summer. ing to their amount by the application this fertilizer is once introduced, it re- appearance there. Thus you may save

elements essential to their growth; from the harbors where the ashes are debilitated, which is avouched by physicians and others either use less, or have the abili- landed. Their effects is immediately annalysis to be pure as well as effective, which is others either use less, or have the ability to collect their food more readily from a broader area. Some roots respected broadeast, as a top-dressing; but spread broadeast, as a top-dressing; but one of the leading medicinal staples of America.

Tuition for term of 6 weeks, beginning immensely popular in this country, and extensive immensely popular in this country. move from the soil in any ordinary they act more satisfactorily if applied to crop a comparatively small amount of the crops at the time of seeding down. KEEP YOUR LIVER HEALTHY, and certain elements which if abundant in They not only largely increase the crop hus ward off many distre-sing coman available form, would vastly pro-mote their growth and increase their their influence is visible for many years Sarsaparilla Pills. Cure sick or nerve yield; while straw crops demand an afterwards in the increased yield of our headache, dizziness, billiousness available quantity of elements very grass. A farmer who has used ashes bad taste in mouth, dyspepsia, inward different from those needed by grain freely for twenty years, upon a hard, crops. The growth of one variety of worn granite soil, says they will give crop in a measure prepares or fits the soil for some other; the rejectors or soil for some other; the rejections or newly stocked, for eight years, and then excreted matters thrown off by the first if the field is plowed again, they will a box by Dr. D. People are getting acquainted—and those are not ought to be—with the wonderful me that great American Remedy, the

MEXICAN

Mustang Liniment,

FOR MAN AND BEAST.

This liniment very naturally originated in America, where Nature provides in her laboratory such surprising antidates for the maindes of her children. Its fame has been spreading for 25 years.

until now it encircles the habitable globe.

The Mexican Mustang Liniment is a matchies remedy for all external allments of manad beast.

To stock owners and farmers it is larvaluable.
A single bottle often saves a human life or restores the usefulness of an excellent horse, ex. cow, or sheep.
It cures foot-rot, heef-all, hellow horn, grub

ti cures footrot, heof-ail, hellow horn, grub, strew-worm, shoulder-rot, mange, the bites and stings of poisonous reptiles and insects, and every such drawback to stock breeding and bush life. It cures every external trouble of horses, such ne lamenes, scratches, swinny, sprains, founder, wind gall, ring-bone, etc., etc.

The Mexican Mustang Liniment is the quickest cure in the world for accidents occurring in the family, in the absence of a physician, such as burns, soalds, sprains, cuts, etc., and for rheumadism, and stiffness engendered by exposure. Particularly valuable to Miners.

It is the cheapest remedy in the world, for it penotrates the muscle to the bone, and a single application is generally sufficient to cure.

Mexican Mustang Liniment is put up in three sizes of bottles, the larger cones belog proportionately much the cheapest. Sold everywhere.
